

Principle of consistency

- The properties of the image should match the properties of the data

- Principle of Importance ordering

- Encodes the most important information in the most effective way.

What design criteria to follow:

- Expressive res.

- (1) expresses all the facts with the data

- (2) only the facts in the data

Limitation of ART

- Network, hier, codes, maps, diagrams
 - Also: Structure, animation, illustration.
 - No interaction
 - Does not consider semantics / conventions
 - Assumes single visualization as output
-
