

Bump chart

- Similar to line graph
 - Y-axis rank rather than continuous values.
-

Area Graph

- Commonly used to compare two or more quantities
 - The area between axis and line are commonly emphasised with colours and textures.
-

Radar graphs

When to use:

- represent data across of cyclical nature of time

Trellis Display

Typically view a variable

Distribute different values
of that variable across
views

* dplyr: grammar of data
manipulation

Pipe
Operator

* %>% , and then pipe to

e.g. 1000 %>% sqrt %>% round

take 1000 sqrt it
then round it.
